IMPORTANT DATES

Homework is due on Tuesdays (for now)

- ▶ Homework 2: February 28, 23:59
- ▶ Homework 3: March 7, 23:59

TODAY: EXERCISES, INTRODUCTION TO ASP

- ▶ Exercise 1: Finding answer sets
 - ▶ Can copy-paste to clingo to check
 - ▶ But manually calculating reducts is good practice

TODAY: EXERCISES, INTRODUCTION TO ASP

- ▶ Exercise 1: Finding answer sets
 - ▶ Can copy-paste to clingo to check
 - ▶ But manually calculating reducts is good practice
- ▶ Exercise 2: Encoding knowledge in ASP
 - ▶ Without “cool” features (choice rules, etc.)
 - ▶ Solved in PROP logic last time:
 - ▶ But it is also useful to start from scratch

TODAY: EXERCISES, INTRODUCTION TO ASP

- ▶ Exercise 1: Finding answer sets
 - ▶ Can copy-paste to clingo to check
 - ▶ But manually calculating reducts is good practice
- ▶ Exercise 2: Encoding knowledge in ASP
 - ▶ Without “cool” features (choice rules, etc.)
 - ▶ Solved in PROP logic last time:
 - ▶ But it is also useful to start from scratch
 - ▶ Can check answer sets “on the go”: be sure to use the `num_answer_sets` parameter to not print hundreds of answer sets

USEFUL EQUIVALENCE FOR ASP

$$(a \vee b \vee \neg c \vee \neg d) \equiv \neg(\neg a \wedge \neg b \wedge c \wedge d)$$

USEFUL EQUIVALENCE FOR ASP

$$(a \vee b \vee \neg c \vee \neg d) \equiv \neg(\neg a \wedge \neg b \wedge c \wedge d)$$

`:- false(a), false(b), true(c), true(d).`
